

About Mission Health Partners

Mission Health Partners (MHP) is a physician-governed network of hospitals, physicians and other healthcare providers working together to improve healthcare quality, performance, efficiency and value for the residents of western North Carolina.

MHP is among the largest Medicare ACOs in the country, covering 60,000 Medicare beneficiaries. MHP also covers more than 18,000 lives through the Mission Health employee benefits plan, 9,000 patients through Humana Medicare Advantage, 6,200 UnitedHealthcare Medicare Advantage members and over 900 Healthy State beneficiaries, through both its Medicare Advantage and direct-to-employer offerings. In 2018, MHP added Medicare Advantage lives through WellCare. We are currently accountable for the cost and quality of care for more than 10 percent of western North Carolina.
